PROJECTS

ATM Machine: I have developed an ATM Machine based on Core Java, showcasing my proficiency in Java programming and object-oriented design. This project involved the use of key Java features like classes, inheritance, and collections to simulate ATM functionalities such as account balance enquiries, cash withdrawals, and deposits.

Zomato Website: I have created a Zomato website using HTML, CSS, seamlessly blending aesthetics and functionality. The project showcases a user- friendly interface for exploring and ordering from a variety of restaurants, employing a clean design with responsive elements for an optimal browsing experience.

Portfolio: I designed a Portfolio using HTML, CSS, JavaScript, showcasing my proficiency in front-end web development.
